

RF REMOTE CONTROL SWITCH TRANSMITTER USER INSTRUCTION

Ref. EMW100TS (To be used with RF Receiver, eg. RFC1RC or EMW100R)

A. Features

1. These innovative wireless transmitter and corresponding wireless receiver are easy to configure and simple to operate.
2. Blinking red LED indicates signal transmission status

B. Diagram & Descriptions

No.	Description	Function
i	ON	Switch on the connected appliance to the RF receiver
ii	LED	The red LED blinks to indicate signal transmission status.
iii	OFF	Switch OFF the connected appliance to the RF receiver

B. Operation

1. Configure

Press the “ON/OFF Learning Code” button on the receiver until the red LED “Indicator” blinks. Then press the switch’s “OFF” position until the receiver’s red LED “Indicator” goes off. The receiver is trained to respond to the corresponding channel.

Remark: Each transmitter EMW100TS can command as up to 10 receivers. Receivers should not be located too close to avoid signal interruption.

2. Control

Press the “ON” or “OFF” position to control the connected appliance to the receiver trained.

Caution

For safety reason, always switch off your appliance before connection.

E. Specifications

1. Battery : CR2032 x 2
3. Frequency : 433.92 MHz
4. Distance : 70 meters max. (open area)
